My notes for your use

Called to order at 2:30 p. m.

The Chairman mentioned the formation of the TSD Awards Panel.

25X1A

██████████ reported that the Panel was working well. They have reviewed eight suggestions thus far. The major mission of the Panel is to determine line of duty.

NOTES ON CASES

25X1A

63-101 - Uses paper tape. Not many stations use. TSD ██████████ says the suggester's system was used in seven or eight installations. TSD Advisor says that he thinks this technique triggered development of magnetic time-date-dial pulse system. However, he thinks the paper tape system is not valuable enough to cancel work on the magnetic tape development.

Action - \$300 award (High-Local).

Send separate ltr to the suggester thanking him for ██████████ bringing the case to our attention again. Advise him that the Panel unfortunately did not have the full facts during the first evaluation of the case and we are therefore glad to know that he brought the case to our attention again.

25X1A

25X1A

67-284 - Explored before. TSD advisor said it gives two to three more areas to use in his approach. We should ask ██████████ what this does. Ask ██████████ if added thrust is valuable. Get F ██████████ and 25X1A TSD to combine their thinking on this case. Deferred.

67-305 - Thank you ltr.

25X1C

██████████
engineer or machinist you should foul up the operation. In other words, only machinists should operate the machine. Yet there are certain inconsistencies in the evaluation. Action - deferred for further study. Tell suggester we are still studying the potential benefits of his proposal.

-2-

- 68-128 - Has been considered many times. Ltr of Thanks. ✓
- 68-129 - Chance of retaliation, etc., - we are really more vulnerable. Tell suggester that proposals of this type have come up before and have been ruled out because they were in conflict with national policy. ✓
- 68-41 - Impractical. Thank you ltr. ✓
- 68-67 - To difficult to wield.
- 67-268 - Problems such as how would you get your car greased without arousing curiosity. Evaluated as too risky. No practical value.
- 68-98 - Technique not new. Has been explored.
